MEMORANDUM FOR THE RECORD

SUBJECT: Automatic Data Processing

I talked to Mr. Joe Moody, Deputy Administrator, GSA, about the bill which makes them responsible for coordination of computer activities. I told him we had explained our problems to the Committee and they were sympathetic and mentioned their sympathy in the Committee report. I said I really did not think there would be any trouble in working our problems out. Mr. Moody said that they had not expected the bill to pass, they had no money for action under it, and things would move very slowly. The Bureau of the Budget was quarterbacking and any regulatory material would be subject to the normal coordination process with ample opportunity to work out any problems. He said we were not unique and others would have similar problems and he did not expect any trouble.
